Summary

Hello. I am a software engineer with more than 4 years of experience. Good specialist in React-based applications. I have experience with both frontend side (React.js) and backend (Node.js). Stick to new technologies. I have a lot of experience in startup projects.

Experience

Frontend Engineer – Jul 2023 – Present
Kyros AI – Silicon Valley, California, United Sates, Remote
- Taking part in problem discussion meetings.
- Assure proper validations and checks before data is submitted to the backend
